

 S&W  
Technologies Site-Wise™

## Are you doing all you can to protect your facility's people and assets?

Site-Wise provides instant access to photographs, floor plan maps and component details of a facility in the event of an accident, emergency or equipment maintenance and outage.

### Site-Wise:

Over 14 years of proven industrial and nuclear power plant experience

Contact us today to learn more about how we can make your workplace safer and more efficient

Site-Wise allows instantaneous access to pinpoint equipment problems or hazards when every second counts.

### How Site-Wise Works:

- Allows you to catalog still pictures or video for an interactive tour of the interior and exterior of your facility
- Creates a visual representation of any location including access paths
- Facility components can easily be cataloged for reference
- Multiple users can access information through an intuitive interface
- Data is stored using the latest encryption and security technologies
- New information can be added easily to allow frequent updates
- Full color photos, floor plan maps and components can be printed
- Hyperlinks can be configured to provide real time data from remote sensors or video feeds

### Site-Wise Solution for Incident Management

- Provides on scene and remote emergency response personnel instant access to vital information
- Pictures, floor plan maps and component details are accessible for interagency communication and coordination
- Information is instantly available on a portable PC, over a network or the Internet
- Site-Wise is ideal for emergency preparedness training

### Site-Wise Solution for Business Continuity Planning & Recovery

- Provides a complete visual inventory with a cataloged virtual tour of the facility
- Detailed photos and floor plans can be coupled with appraisal information for a seamless recovery plan
- Detailed documentation and records will speed up insurance claims process

### Site-Wise Solution for Facility Maintenance and Modification

- Each component is photographed and cataloged in relation to its location on the facility floor plan
- Data can aid routine maintenance programs and unplanned maintenance
- Hyperlinks can be configured to link real time sensor or equipment feed data
